

Rust Converter

Converts Rust into an Inert Protective Coating

Product # 451

DESCRIPTION

RUST CONVERTER chemically converts rust into an inert, protective barrier coating. It neutralizes existing rust by changing the chemical structure of rust and stops future rust, corrosion and oxidation of iron or steel surfaces by covering the surface with a tough durable polymer barrier.

No sandblasting is necessary. While other treatments can only prepare a clean surface for painting, RUST CONVERTER transforms a rusty, scaly surface into a single inert paintable surface in one easy step.

RUST CONVERTER is a water based solution, ready to use. It is non-flammable, contains no lead or phosphoric acid. Can be sanded, puttied or coated with all types of paints.

USAGE

Recommended for commercial, institutional, educational and industrial use to protect and prepare rusty metal surfaces for painting.

DIRECTIONS

SHAKE WELL BEFORE EACH USE

Do not use in temperatures under 50°F or over 95°F. Protect Rust Converter from freezing.

1. Prepare: Remove flaking paint and rust. Clean surface, let dry.

2. Apply: Shake well. Spread Rust Converter evenly with smooth pad or brush. Use water for clean up.

3. Paint: For best results apply paint or some type of top coat.

PRODUCT SPECIFICATIONS

APPEARANCE	Dark brown liquid
ODOR	Odorless
pH	13.0
BOILING POINT	176° F
FLASH POINT	Non-Flammable
WEIGHT / Gallon at 77°F	9.5 Lbs
COVERAGE	Up to 5 times that of paint
PACKAGING	55- 35- 15 Gallon drums 5 Gallon pails Cases of 6/1 and 4/1 Gallon jugs

SAFETY INFORMATION

Avoid skin and eye contact. If contact with eyes, flush with water for 15 minutes. Get immediate medical attention. For skin contact, wash off immediately with water. If irritation continues, get medical attention.

Close container after each use. If swallowed, do not induce vomiting. Get immediate medical attention

DO NOT TAKE INTERNALLY. KEEP OUT OF REACH OF CHILDREN.
